- **Nett weight:** .171 kg
- **Gross weight:** .38 kg
- **Tare weight:** .209 kg

Outer Carton

- **Outer carton (L x W x H):** 40 x 30 x 22 cm
- **Gross weight:** 3.1 kg
- **Nett weight:** 1.026 kg
- **Tare weight:** 2.074 kg

Product dimensions

- **Cable length:** 0 cm
- **Product dimensions (W x H x D):** 4 x 5.6 x 1.2 cm
- **Product dimensions with stand (W x H x D):** 4 x 8.8 x 8.8 cm
- **Weight (with stand):** .105 kg

Product highlights

1.3 Mega pixels

With 1.3 Mega pixels you can use your webcam as a camera for taking high-quality photographs that are even good enough for printing larger sized high quality images.

3x digital zoom

Zoom in and out to get the perfect framing for any image. You control the zoom entirely via the onscreen interface while you're looking at the image so you can adjust it perfectly.

Built-in digital microphone

The built-in digital microphone allows you to talk naturally and freely or to add sound to a video clip recording.

Automatic face tracking

The state-of-the-art camera software automatically detects your face and moves the lens to follow you as you move. You stay in the center of the image even if you move during a video conference. It gives you the freedom to express yourself and converse naturally.

Precision glass lens

Sharp, crisp and clear. Precision glass lens guarantees you high image quality for all applications - from snapshot to video messaging. The finished lenses are coated with a special film to extend their working life and protect them from wear and tear and dust accumulation.

Change Your Background

Replace your real-life background and fool your friends into thinking you're somewhere else! You can move around and chat as normal, while the software automatically fills in the background behind you. There are 15 great backgrounds to choose from, or you can upload and project your own favorite backdrop.

Exciting fun frames/effects

Keep chatting fun by adding the unexpected. Surprise your friends with one of ten themed fun frames around your face to match your chat. Or entertain them with special fun effects that will make you look like negative, embossed or even distorted.

Add fun logo to your webcast

Personalize your webcast or blogs by adding your own fun logo. This special software enables you to insert a small image in any corner of the streaming video, the same way that TV channel logos appear on your television.

800 DPI accurate reactions

With 800DPI, this mouse provides accurate reactions. The cursor will move exactly where you want it. It's all thanks to the high-definition optical sensor that registers even the smallest movements. Giving you complete cursor control.

Precise optical sensor

Philips optical technology ensures extra accuracy and responsiveness. You can work with it on most surfaces, including wood, plastic or paper.

Retractable cable mouse

This retractable cable saves space making it ideal for travellers
